# What A Liberty Bond Is

given the important points concerning the ger rate of interest. U.S. Covernment Bonds so that everyone may clearly and plainly understand just what they are.

The promise of the U. S. Government-A U. S. Covernment Bond is an official promise and agreement by the United States of America to pay back to you the money which you have paid for your Bond, and also to pay you interest on that money as long as you keep the bond- In the case of this present issue of U. S. Government Liberty bonds the rate of interest is 31/2 %

The question of safety-Ever since the United States Covernment was first established, United States Government Bonds have been considered by business men. bankers and investors of every sort as the safest form of investment in the world. There is no possible chance of loss, for every bond is guaranteed by the United States of America. Every bond is guaranteed by all the wealth, all the land and all the money in the whole United States.

The profits-These U. S. Liberty Bonds will pay you interest at the rate of 4% a year, which is 1/2 % more than you get on postal savings. And besides that they are

There's nothing hard to understand about free from all taxation, so that in reality your a United States government bond. There's interest of 4% is better than 51/2% on an nothing mysterious or complicated. And all investment on which you have to pay taxes. these Liberty Bonds that hundreds of Moreover, if the Government should issue a thousands of people all over America are new series of bonds later, on which a higher buying now are simply United States Gov-rate of interest would be paid, then you ernment Bonds to which the Government has can exchange the bonds you purchase now given the name "Liberty Loan." Below are for bonds of the new series and get the big-

Increase in value-U. S. Government Bonds have always increased in value soon after being issued, because of the enormous demand by investors, bankers and financiers who want to invest their money where it will be absolutely safe. The \$100 bonds the Government issued at the time of the Spanish-American war sold a short time later for \$111. In other words these pecple who bought them for \$100 at the start were able to sell them at 10% to 11% more than they paid for them and had their interest besides. It can reasonably be expected that this present issue of Liberty Bonds will also increase in value.

You can borrow money on them-If you should need money at any time, you can take your Liberty Bonds to any bank and borrow money on them. Bankers consider U.S. Bonds the best possible security you can give, and are glad to loan money on them.

You can sell them-U. S. Government Bonds can always be turned into cash if any emergency should arise in which you should need money quickly, You can sell them at any time, for they are considered as good as gold itself. You will never be "broke" if you own a U. S. Government Liberty Bond. And your money is not tied up where you can t get at it.

**Boone County Liberty Loan Organization**
